2023/24

Quality from Germany

Uebler stands for tradition and innovation "Made in Germany". The owner-managed company from the Franconian town of Forchheim develops and produces creative, yet practical solutions for bicycle transport - entirely in Germany with close ties to the region.

With qualified employees, value creation from development to production and assembly to sales takes place exclusively at the headquarters - in collaboration with reliable suppliers and partners from the region. This way, Uebler ensures that customers and trade partners receive technically outstanding products of the highest quality that rightly bear the quality seal "Made in Germany".

Multiple test winner

Uebler not only impresses its customers - the company has also prevailed in most product tests. A total of 49 test victories since 2011 is an outstanding figure!

The decisive factors for these very good ratings are the standards Uebler sets when it comes to ease of use, technically up-to-date solutions, quality standards and, above all, safety - always geared to the needs of the customers.

test wins summary 2019-2021

test wins summary 2021-2022

Conviction across the board

Spacers for 1st and 2nd bicycle, lockable and removable

Ratchet system for optimum fixing of bike wheels of almost any type and size

Widened bike rails suitable for all popular tyre widths

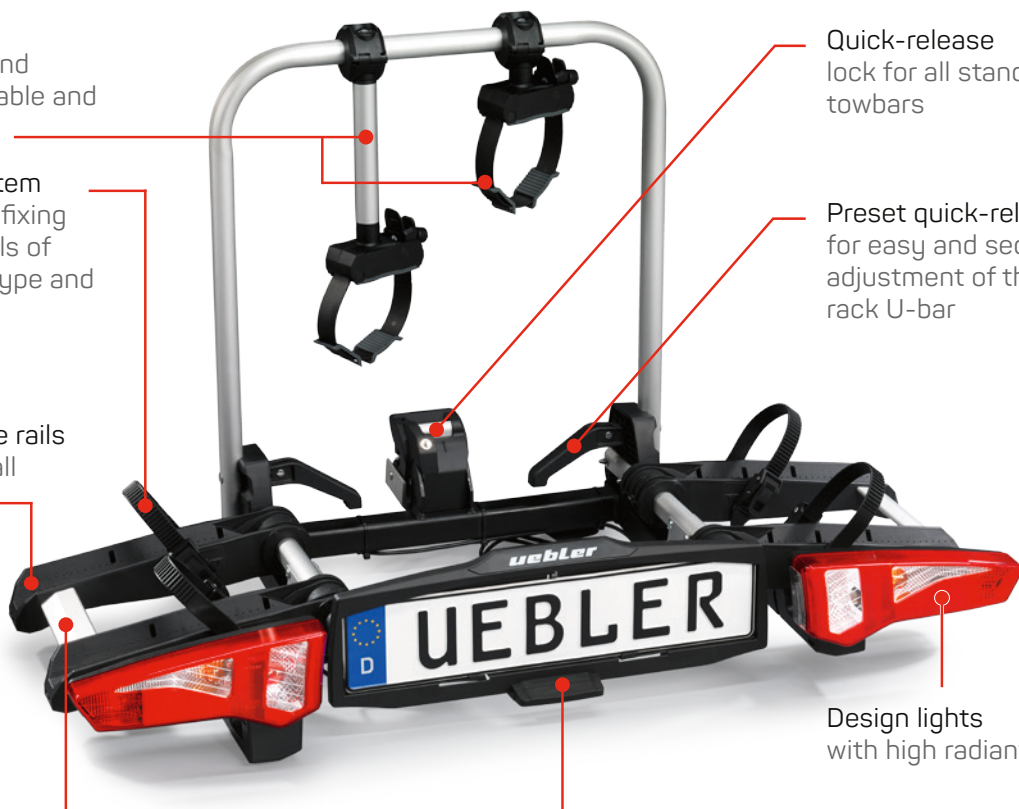

Integrated handle for easy folding out/in of the bike rails and lights (not available for all models)

Pedal for comfortable folding of the carrier (not available for all models)

Quick-release lock for all standard towbars

Preset quick-release levers for easy and secure adjustment of the rack U-bar

Design lights with high radiant power

S-line

Spacer with clamps:

- 1 The spacer with clamps grips around standard frames. The spacers are easily mounted by pressing together the clamps with one hand.

- 2 Spacers with suitable length are available for every bicycle position.

- 3 The bicycles are fixed on the rack frames by the spacers.

Z-line

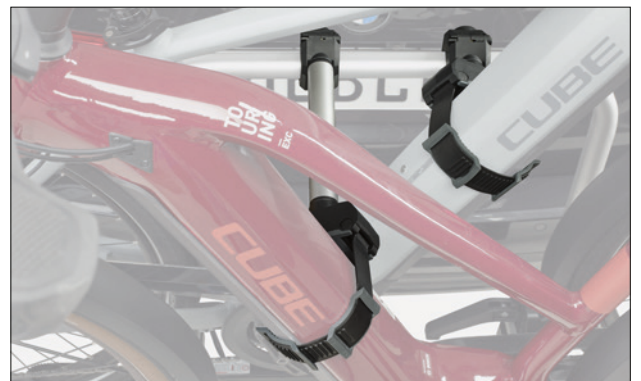

Spacer with toothed belt:

- 1 The spacer with toothed belt was developed for sheathing box-section frames. Press the red button, the spacer can then be mounted easily with only one hand.

- 2 Spacers with suitable length are available for every bicycle position.

- 3 The bicycles are fixed on the rack frames by the spacers.

Uebler offers two types of spacers for fixing different bicycle variants on Uebler bike racks. The spacer with clamps is suitable for all bicycle frames with a round tube up to 75 mm \varnothing or an oval tube up to 75x45 mm \varnothing . The spacer with toothed belt is used for bicycle frames with larger dimensions. The maximum frame sizes are then up to 115 mm \varnothing for a round tube, up to 120x80 mm for a rectangular tube and up to 95x95 mm for a square tube.

i-Series / i-Series DC

Innovation & Perfection

A successful symbiosis of intelligent, lightweight construction and perfect engineering: the revolutionary and patented IQ fastener allows safe, simple and lever-free attachment. Like the entire product range, the premium carriers of the i-series consistently epitomise safety, product quality and resilience. Since their market launch in 2017, they have already won 23 tests. The carrier series was not only awarded as one of the most lightweight, but also as one of the most user-friendly in its class. The best ratings by far were also achieved for the design.

For the 2023 season, the new i31 Z and i41 S models will once again set new standards: With a very low unladen weight, a particularly high payload is possible without the need for additional securing to the vehicle.

“Made in Germany” – with a 3-year guarantee.

- Easy and labour-saving attachment to the towbar with leverless, patented IQ quick-release fastener
- Patented, removable spacers with single-hand operation
- New extra-wide wheel rails for tyre widths up to 4.5 inches
- Foldable wheel rail and lamp unit
- Ratchet system for securely attaching the wheels to the wheel rail
- Convenient release of the folding function with foot lever
- Quick-release lever for fixing the wide carrier frame
- Simultaneously locking anti-theft device
- Low unladen weight for high carrying comfort and large payloads

i41 S-DC

Art.-No. 18140-DC

- With Distance Control

- Folded

Distance Control (DC)

These innovative carrier systems with the integrated Distance Control (DC) parking aid at the highest Uebler standard combine all the advantages of the respective products with additional convenience when reversing and parking. Obstacles are detected unerringly and are indicated visually and acoustically.

The electronic parking aid is automatically activated when reverse gear is engaged and the distance warning system installed as standard in the vehicle is switched off. Separate wiring with the vehicle is not necessary. The reception display is simply plugged into the cigarette lighter or an on-board socket and is immediately ready for use.

X-Series

Handling & Lightness

Since its launch in 2011, the X21 series has set clear standards with 26 product test wins/best ratings, which also applies to the latest wins/best rating generation. Apart from being lightweight and stable, these racks are characterised by the easiest possible handling and their unique folding concept. Ergonomically well thought-through, functional and easy to understand, and at the same time extremely stable and resistant.

"Made in Germany" - with a 3-year guarantee.

- Lightweight and compactly folding, enables easy handling and stowing away
- Patented quick-release lock with anti-theft device
- Bike rails easily folded using integrated handle
- Extremely convenient tilt mechanism using a large foot pedal
- Safe transport of all bicycle types and e-bikes
- Low self-weight for high carrying convenience and large load capacity
- Removable bike holders with one-hand operation and anti-theft device
- Preset quick-release levers for easy and secure fastening of the U-bar
- Ratchet system for secure fixing of the bike wheels, centred on the bike rail
- "Eli" design lights series, slidable sideways
- One key for all locks

F-Series

Reduction & Ergonomics

The F-series is the highlight when it comes to individualism and easiness. Easily mounted – easily loaded – easily transported – easily dismantled. Individualists are in the right place here: With the bike rack for only one bicycle, Uebler offers one of the lightest and, when folded together, one of the most compact tow-bar bike racks on the market. The F-Series naturally also includes variants for transporting 2 or 3 bicycles. Ergonomic down to the smallest detail and mounted in seconds. The patented quick-release lock ensures safe and convenient transport. All racks are completely fold-away, however, they cannot be tilted down on the vehicle.

“Made in Germany” - with a 3-year guarantee.

- Lightweight and compactly folding, enables easy handling and stowing away
- Patented IQ fastener with anti-theft device
- Low self-weight for high carrying convenience
- Safe transport of all bike types and e-bikes
- Partly removable bike holders with one-hand operation and anti-theft device

P-Series

Flexibility through Extension

The P-series racks can be extended by one rail each if necessary and so can be flexibly adapted to your needs. And it goes without saying that they are also equipped with a patented quick-release lock and the well thought-through ergonomic principle of all Ueblerr bike racks.

These racks have convincing features such as innovative, removable bike holders for bikes, optimised quick-release fasteners and the modern, slidable light system.

"Made in Germany" - with a 3-year guarantee.

Check with the respective car manufacturer whether rack with securing straps can be used!

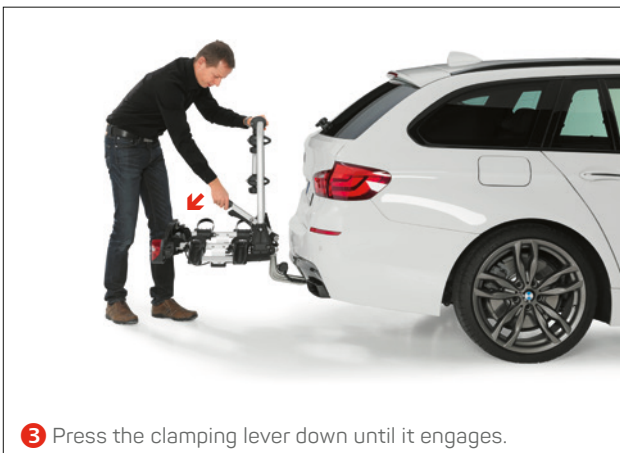

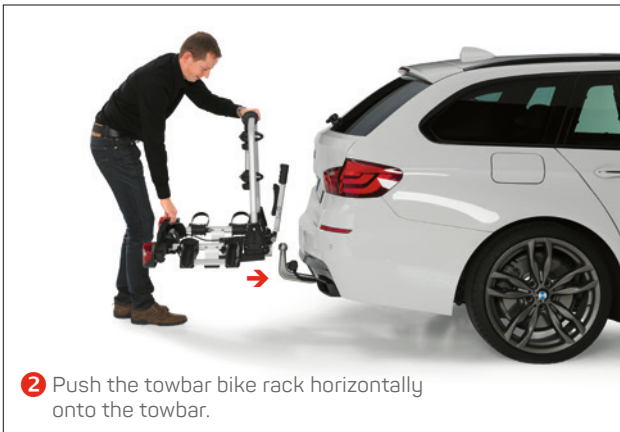

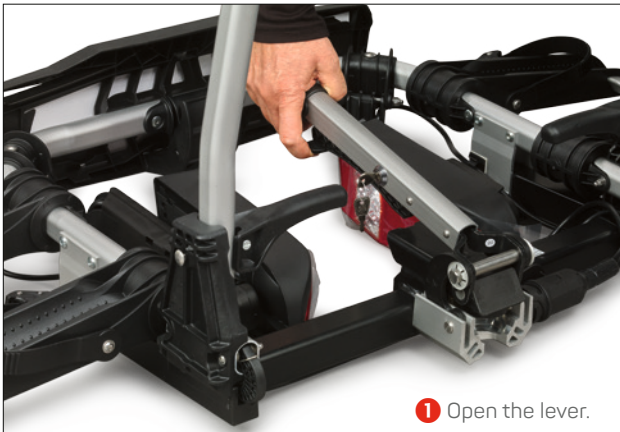

Simple mounting of the towbar bike racks

Uebler towbar bike racks are available, depending on the model, with two different patented quick-release lock systems. The traditional quick-release lever lock or the modern IQ fastener. Both variants enable easy and uncomplicated fixing of the towbar bike rack on the towbar coupling. Above all, the IQ fastener enables all customers to fix the towbar bike rack on the vehicle conveniently, without exerting any force. Try it out for yourself at your local trading partner, you will be impressed!

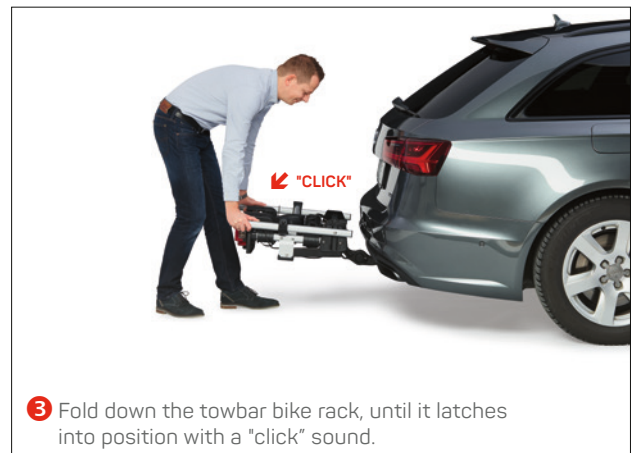

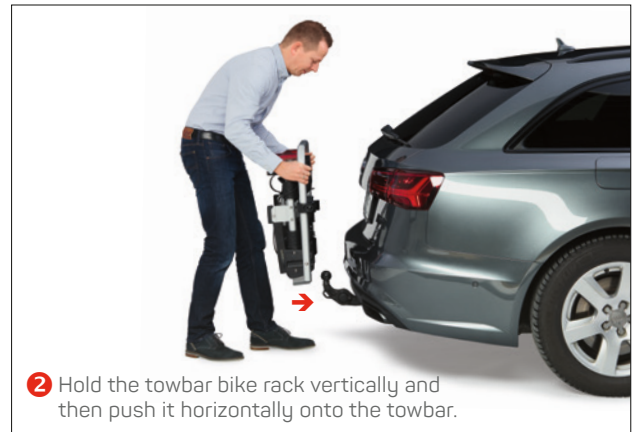

Both quick-release locks systems are suitable for all standard car towbar systems.

IMPORTANT: Always note the support load of the towbar!
